Subject: 466 waters dr variance

Mr. Neill, I am requesting approval to move forward with this project. Attached are the plans and survey. The structure is in flood zone X. I am proposing an interior remodel of the structure, without changing the footprint or square footage on the parcel. Mr. Peterson requested that I get a variance per village ordinance 3.12.2(c)(5). The existing structure is not compliant with current set back requirements. Proposed construction will increase structural integrity of the north side of structure by adding a footer that is current with new building codes.

The north existing wall , per survey is 1.5 ft - 4 ft inside 25ft setback and entire east side of structure is inside current setbacks. I am requesting permission to move forward with this remodel project leaving the existing structure in its original footprint.
